

Rachit Gandhi | Software Engineer

rachitgandhi27@gmail.com | +91-9650470567 | New Delhi, India | rachit-gandhi.in

EDUCATION

Birla Institute of Technology and Sciences, Pilani

MSc. Mathematics and B.E Electronics and Instrumentation

May 2025

Rajasthan, India

- **Leadership:** SLAM Researcher Lead @ **Sally Robotics**
- **Publications:** Primary Authorship @ **ACM ICER 2025** - Rubric Is All You Need: Improving LLM-based Code Evaluation

PROFESSIONAL EXPERIENCE

Q3 Technologies

Mar 2025 – Present

Software Engineer

Gurugram, Harayana

- Architected and deployed an orchestration-driven educational chatbot using **Azure OpenAI, Azure AI Foundry, and Azure AI Search**, achieving an **80% reduction in student inquiry emails** and significantly improving communication efficiency.
- Engineered secure **OAuth 2.0 integrations** between **Canvas and Blackboard LMS** platforms and micro-frontend enabling delegated API access to **2,000+ endpoints** and allowing AI agents to retrieve real-time institutional data seamlessly.
- Designed a **reusable Vue.js chatbot micro-frontend** with dynamic branding capabilities and implemented schema-isolated multi-tenancy in the backend architecture, reducing new client integration efforts by ~90% while cutting university onboarding and customization time from one month to five minutes.
- Built an enterprise search platform integrated with **Microsoft SharePoint**, leveraging **Azure AI Foundry and Azure AI Search** to deliver **RBAC-controlled multi-hop agentic retrieval** for secure, intelligent knowledge discovery across organizational documents.

KPMG

Jul 2024 – Dec 2024

AI Solutions Engineer

Gurugram, Harayana

- Developed and deployed a solar downtime prediction model using **Azure ML Studio** and Functions that successfully **prevented an estimated 40% revenue loss** due to curtailment during critical operational hours.
- Achieved a remarkable 90% reduction in transaction data processing times by implementing **Spark Pipelines** on **Azure Databricks** for analyzing over 24 billion rows of vehicle toll data efficiently.

TECHNICAL SKILLS

- **Programming Languages:** Python, Go, JavaScript
- **AI & GenAI Frameworks:** LangChain, Langgraph, LLMs, RAG, Knowledge Graphs, Harness Engineering, Azure ML, Azure AI Search, Azure OpenAI, GCP Vertex
- **Backend Technologies:** GoFiber, FastAPI, Flask, Django REST Framework, Node.js, PostgreSQL, Pinecone, PySpark
- **Cloud & Infrastructure:** Azure Foundry, Docker, Apache Kafka, Kubernetes

PROJECTS

[TraceFlo](#) | AI Replay Engine for Functional Testing | May 2026

- Built Chrome extension to capture real-world browser workflows, supporting SPA navigation and DOM mutations, leading to a 70% reduction in manual testing effort.
- Implemented AI-based workflow segmentation and replay-oriented event modeling within TraceFlo, enhancing functional testing efficiency and increasing test script reusability by 50%.
- Deployed a Go-based MCP server within GoFlow to host playwright scripts, facilitating repeatable web workflows and accelerating deterministic functional testing.
